Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 10-12, 15-20 drawn to a timing control means at each display element of a liquid crystal display device, classified in class 345, subclass 99.
 - II. Claims 8-9, 13-14 and 21-22 drawn display power source controlling system, classified in class 345, subclass 211

Election/Restrictions

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, for example the invention, has separate utility such as the timing control means at each display element of group I which does not control for power source to be supplied to the IC and monitor the voltage drop below a predetermined reference voltage drop recited of group II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
